

LOCATION	Macarthur Square Shopping Centre, Campbelltown, NSW
PROPERTY MANAGER	Lend Lease Retail
ARCHITECT	Hassell Architects
DESIGN MANAGEMENT, PROJECT MANAGEMENT AND CONSTRUCTION	Bovis Lend Lease
INSTALLER	Panadell Architectural Cladding Pty Ltd
APPLICATION	External Walls, lift cladding

Macarthur Square is the largest shopping centre in one of the key growth areas of South Western Sydney and has been servicing the local region since 1979.

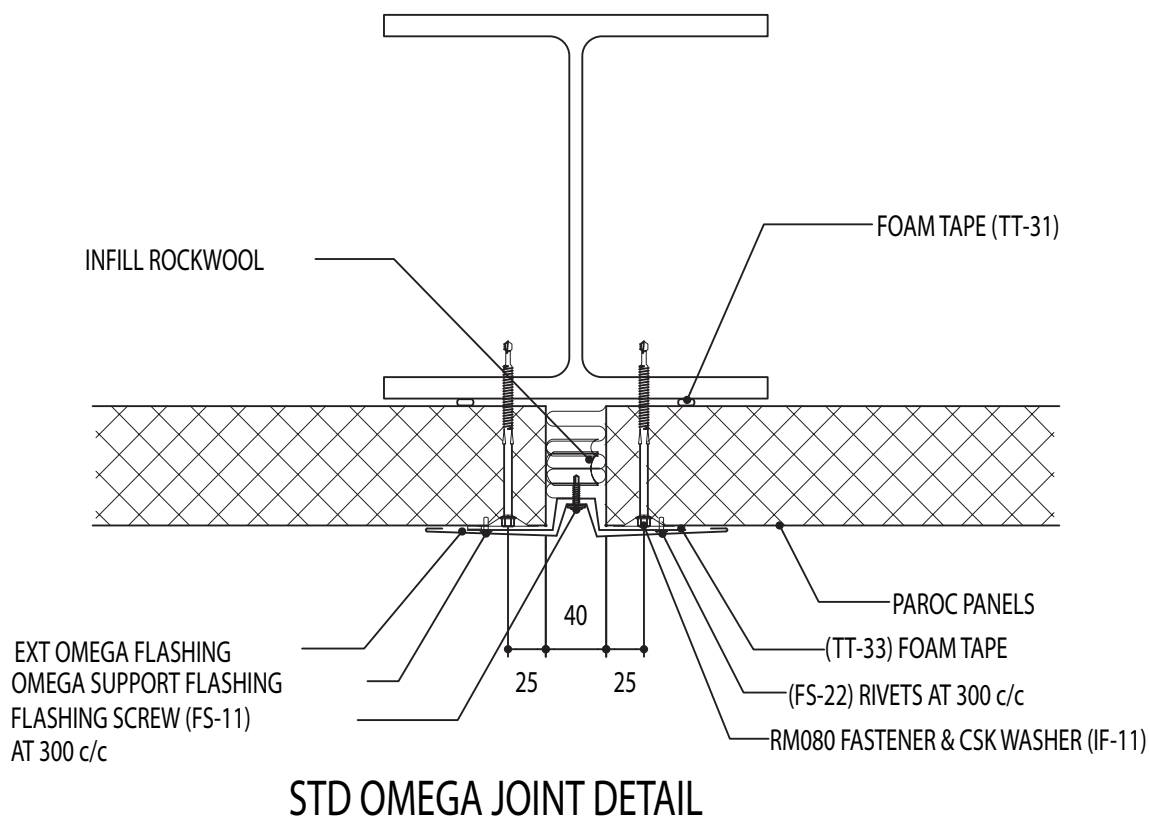

Bovis Lend Lease were contracted to design & construct a new extension at Macarthur Square in 2004. The requirement for the facade was a fire rated panel with a span capability of up to 6 metres. They considered a number of sandwich panel and precast concrete systems for the exterior cladding before choosing to make this their first project using Bradcore's Paroc panels.

“We were looking for a fire rated panel for this job and the Bradcore Paroc system was ideal for our needs” said Nick Gaudry, Project Manager, Bovis Lend Lease. “The fact that the panel can span 6 metres, fixed only at the ends, meant we could reduce the amount of steel framework required, saving time and money. We only wish we had completed the panel selection earlier in the design process so we could have enjoyed all the available savings.”

A total of 3000m² of panels were used in the project in a range of sizes and colours.

On completion of the project there was a greater understanding of the panel system by the project team and they could see further savings being made on future projects with the use of Bradcore panel systems.
